-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Claims 4, 8 and 13 are presented for examination.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Page 21, line 8 of the Applicant's specification states that information terminals 130 yet the none of the figures display such terminals. This is throughout the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Page 18, line 7 in the Applicant's specification states the information terminal support server 110 yet the none of the figures display such terminals. This is throughout the specification. Corrected drawing sheets in

compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "132" has been used to designate both agent information terminal and customer information terminal. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

Art Unit: 2143

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 4, 8 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Tso et al. U.S. Patent No. 6421733, (hereinafter Tso).

7. Referencing claim 4, as closely interpreted by the Examiner, Tso teaches an information processing method in an information processing system having an information terminal support server which supports an information terminal connected to a content server and loaded with a client program, the method comprising the steps of:

8. (a) receiving, at the information terminal support server, a message sent from the content server responding to a request from the information terminal, (e.g., col. 14, lines 1 – 20);

9. (b) determining whether or not said message agrees with a predetermined condition, (e.g., col. 3, lines 8 – 44, “*transcoder, parser*”);

10. (c) editing said message to insert a command for the client program when said message agrees with said predetermined condition, (e.g., col. 2, lines 44 – 49 & col. 10, lines 37 – 49 & col. 14, lines 21 – 63); and

11. (d) sending said message in an edited form to the information terminal, (e.g., col. 14, line 64 – col. 15, line 28).

Art Unit: 2143

12. Claims 8 and 13 are rejected for similar reasons stated above.

13. Claims 4, 8 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Lincke et al. U.S. Patent No. 6397259, (hereinafter Lincke).

14. Referencing claim 4, as closely interpreted by the Examiner, Lincke teaches an information processing method in an information processing system having an information terminal support server which supports an information terminal connected to a content server and loaded with a client program, the method comprising the steps of:

15. (a) receiving, at the information terminal support server, a message sent from the content server responding to a request from the information terminal, (e.g., col. 12, lines 10 – 26 & col. 15, line 42 – col. 16, line 22);

16. (b) determining whether or not said message agrees with a predetermined condition, (e.g., col. 21, lines 24 – 57 & col. 78, lines 10 – 44);

17. (c) editing said message to insert a command for the client program when said message agrees with said predetermined condition, (e.g., col. 22 lines 25 – 55); and

18. (d) sending said message in an edited form to the information terminal, (e.g., col. 12, lines 10 – 26 & col. 15, line 42 – col. 16, line 22).

19. Claims 8 and 13 are rejected for similar reasons stated above.

Conclusion

20. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

21. a. Appleman et al. U.S. Patent No. 6336132 discloses Internet resource location system with identified and approved human guides assigned to specific topics to provide content related to the topic.

22. b. Huang et al. U.S. Patent No. 6438576 discloses Method and apparatus of a collaborative proxy system for distributed deployment of object rendering.

23. c. Lim et al. U.S. Patent No. 6434619 discloses Internet-enabled service management system and method.

24. d. Kariya U.S. Patent No. 6169897 discloses Mobile communications system and mobile terminal therefor with capabilities to access local information resources.

25. e. Kanevksy U.S. Patent No. 6300947 discloses Display screen and window size related web page adaptation system.

26. f. Jawahar et al. U.S. Patent No. 6298356 discloses Methods and apparatus for enabling dynamic resource collaboration.
